## Phạm Vũ Hải Đăng\_ITITDK23016

**Pham Vu Hai Dang**

**Junior Frontend Developer**

220/2 Ho Van Hue P.9 Q.Phu Nhuan  
TPHCM, 40000  
Phone number: 0902013820  
bixbixbixi@gmail.com

**Skills**

HTML, CSS, JavaScript, Accessibility, Figma to Design, Responsive Web Design, Technical Writing, Presentation, programming (C++, C#, Python) and game engines (Unity, Unreal Engine)

**Education**

International university - khu phố 6, TP Thủ Đức, Hồ Chí Minh, Việt Nam - undergraduate  
9/2023 to 9/2029  
List of exciting things I did at university:

- Create helpful project
- Make a lot of new friends
- Join AI club

**Experience**

Company Name: Neteas, China - game development

Month 20xx to Month 20xx

- Create in-game hunter for Identity V
- Create maps for Identity V
- Create black jack mod in Identity V

Skills gain: Teamwork, creativity, improve coding skills

Company Name: Neteas, China - web Developer

Month 20xx to Month 20xx

- Top-up site for NetEas games
- Create official website for NetEas games

Skills gain: Teamwork, creativity, improve coding skills

Across the internet

### 1. Semantically Correct HTML Structure:

What they are:

- A semantic HTML structure means using tags that describe the meaning and purpose of the content — not just how it looks. These tags tell browsers, screen readers, and search engines what each part of your page represents.

Where:

```
<div class="cv_box">
  <div class="info">
    <h1>Pham Vu Hai Dang</h1>
    ...
  </div>
</div>
```

Why use them:

- Helps browsers and screen readers understand your page's structure (important for accessibility).
- Boosts SEO (search engines recognize the hierarchy).
- Makes your HTML more readable and easier to maintain.

## 2. Single-Page Layout with Sections for Education, Skills, and Career History

What they are

- A single-page layout means all your main content (skills, education, experience) appears on one continuous web page — not spread over multiple links or subpages. Each content category should be in its own `<section>` with a clear heading.

How to use:

```
<main>
  <section id="skills">
    <h2>Skills</h2>
    <p>HTML, CSS, JavaScript, Python, Unity...</p>
  </section>

  <section id="education">
```

```
<h2>Education</h2>
<p>International University – Ho Chi Minh City</p>
<p>Undergraduate (2023–2029)</p>
</section>

<section id="experience">
<h2>Experience</h2>
<p>Netease, China – Game Development</p>
<ul>
<li>Created game content for Identity V</li>
<li>Developed web tools for company games</li>
</ul>
</section>
</main>
```

### Why use them:

- Simple navigation – Employers can see everything on one page.
- 
- Faster loading – No extra pages to load.
- 
- Ideal for online CVs/portfolios – Easy to print or convert to PDF.
- 
- Structured content – Using <section> tags helps browsers understand which content belongs to “Education”, “Skills”, or “Experience”.
